Governing the Energy Transition

*Reality, illusion or necessity?*

*Editors: Geert Verbong and Derk Loorbach*

Table of content

**PART I: Introduction**

1: Transitions and Governance.
*Authors: Geert Verbong and Derk Loorbach*

2: Reaching the limits: Setting the Stage for the Energy Transition.
*Authors: Vincent Lagendijk and Geert Verbong*

**PART II: Transition Analysis**

3: Resisting change: a regime-analysis of energy systems.
*Authors: Erik van der Vleuten and Per Högselius*

4: Challenging the incumbents: an analysis of niche trajectories.
*Author: Rob Raven*

5: Transitions in practice.
*Author: Elizabeth Shove*

6: Civil Society in Sustainable Energy Transitions.
*Author: Adrian Smith*

7: Scenario’s and pathways.
*Author: Geert Verbong*

**PART III: The Dutch case: the Energy Transition Project**

9: Exploring the possibilities for managing transitions.
*Author: Derk Loorbach*

10: The Energy Transition project of the Dutch Ministry of Economic.
*Authors: Frans van der Loo, Bulten and Derk Loorbach*

11: An international perspective on the Energy Transition project.
*Author: Florian Kern.*

12: Monitoring and evaluation of the energy transition.
*Author: Mattijs Taanman.*

13: Looking at the transition paths from a system innovation perspective.
PART IV: Conclusions

14: European energy policy: enabling conditions for a transition course?
Author: Mans Nilsson

15: An integral perspective on energy transitions and their governance.
Authors: Derk Loorbach, Geert Verbong and Howard Geller.
